YUTI MEHER

(Software Web Developer)

yutimeher@gmail.com +91 8208375264 LinkedIn: linkedin/yuti-meher GitHub: github.com/ErYuti

TECHNICAL SKILLS

- **Frontend Development:**
  - HTML
  - CSS
  - JavaScript
  - React.js
  - Next.js
  - Tailwind CSS
  - Responsive Web Design
- **Backend Development:**
  - Node.js
  - Express.js
  - API Design
- **Database:**
  - MongoDB
  - MySQL
- **Tools & Platforms:**
  - Git
  - GitHub
  - WordPress
  - FileZilla
  - Postman
  - VS Code
  - Chrome DevTools
  - Debugging & Troubleshooting

SKILLS ACQUIRED

- Leadership & Communication Skills.
- Problem Solving Skills.
- Photography/Videography, Canva.
- UI/UX design using Figma (Basics).

EDUCATION

- **BTech Electronics & Tele. (E&TC)**

SVKM's Dwarakadas J. Sanghvi College of Engineering, Mumbai 8.61 / 10

- **Diploma (E&TC)**

St. John College of Engineering and Management, Palghar Score: 92.12%

- **SSC**

SSC Bhuvanesh Kirtane Vidyalaya, Mahim Palghar Score: 82.20%

ACHIEVEMENTS

- Participated in Robotics Workshop – Hands-on training in automation, sensors & embedded systems.
- Presented "Smart Dishwasher" at State-Level Technical Competition & Published Technical Paper.
- Presented Technical Paper on IoT-Based Virtual Doctor & Human Care Robot.
- Participated in DJ Strike Technical Competition.

HOBBIES & INTERESTS

- Exploring new places
- Photography and Videography (capturing raw moments).
- Painting and sketching during free time
- Photo and video editing

PROFESSIONAL SUMMARY

Full Stack Developer skilled in MERN stack, building scalable web applications with strong expertise in frontend design, backend API development, and database management. Experienced in delivering user-centric solutions and contributing to enterprise-level projects in fast-paced environments.

PROFESSIONAL EXPERIENCE

- **Software Research Developer | July 2025 – Present | Mumbai**

ThinkAerial Autonomous Systems Pvt. Ltd.

- Developed scalable end-to-end MERN stack applications, ensuring high performance, optimized data flow, and seamless user experience
- Built and contributed to enterprise-level projects such as a GIS web application (handling geospatial data visualization) and a recruitment platform with authentication, dashboards, and real-time features.
- Led project execution by coordinating team tasks, managing progress reporting, resolving technical challenges, and ensuring on-time delivery in a fast-paced startup environment.

- **Software Web Developer Intern | 7 Months | Remote**

OTET Infosystems Software Consultancy Services

- Designed and developed 10+ responsive websites using WordPress, improving usability and accessibility.
- Enhanced website performance using HTML, CSS, JavaScript, and React.js through FTP-based deployments.
- Gained practical experience in frontend development, debugging, and client-driven enhancements.

- **Trainee Research Engineer | 1 Month | Palghar - Dahanu**

Adani Dahanu Thermal Power Station

- Worked on system analysis, process optimization, and technical documentation in large-scale engineering operations.

- **Operational Trainee Engineer | 40 Days | Palghar**

P.M. Electro-Auto Pvt. Ltd

- Assisted in system troubleshooting, operational analysis, and process optimization, strengthening problem-solving skills.

PROJECTS

- **GIS Web Application Platform – ThinkAerial Project**

Developed a production-level GIS platform capable of visualizing and processing 50GB+ geospatial datasets. Implemented map-based interfaces, spatial filtering, optimized APIs, and secure cloud storage for enterprise use case.

- **Hire360 (Freelancing Recruitment Platform) – ThinkAerial Project**

Developed a full-stack recruitment and freelancing platform designed specifically for drone pilots. Implemented job postings, pilot onboarding workflows, recruiter dashboards, role-based authentication, and scalable backend architecture to manage hiring and project assignments efficiently.

- **Mission Planner Web Application – ThinkAerial Project**

Built a MERN-based drone mission planning system enabling waypoint configuration, flight path visualization, and geo-fencing using GIS concepts. Integrated WebSocket for real-time mission updates and live tracking. Designed a scalable architecture to support enterprise drone operations and dynamic data processing.

- **Real-Time Chat Application**

Developed a secure MERN stack chat application supporting persistent messaging and user presence tracking. Implemented low-latency WebSocket communication for real-time data exchange. Designed scalable backend architecture to handle multi-user interactions efficiently.
